-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, there is no function or purpose attributed to the "gap", and as such, the claims lacks clarity and completeness, as it appears that the gap is a major focus of the invention.

In claim 4, the recitation that the locking member is slidably supported between parallel guides appears to contradict claim 1, in which the locking member is rotated (see line 9). Clarification is required. As set forth above, the recitation of the "recess" is not supported with a function or purpose, and as a result, adds no meaning to the claim.

In claim 5, the phrase "wherein the gap portion is narrower than another gap portion", is confusing and unclear, especially as the "another gap portion", has not been sufficiently located and defined.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,5, insofar as definite, are rejected under 35 U.S.C. 102(b) as being anticipated by Takagi.

Figures 1A and 1B show a prior art device having a locking member 25' that engages a gear 12', and which is movable by means of a cam 34'. Note that guides G are provided for the locking member, and a gap R is located between a near side of the guide and the locking member. In regards to claim 4, that the locking member is slidably supported between two parallel guides. Figure 4 shows recesses 28,38 in the locking member.

Claims 2,3,6-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

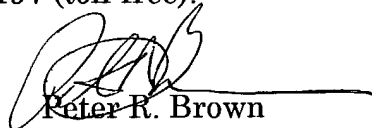

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fourrey et al, Blanchard et al, Ohya, Magyar, Reubeuze et al, Nonomiya et al, and Ikegaya et al show various features of the invention.
